Abhishek Raj Pagadala

AI-Augmented Full-Stack DevOps Engineer · Cloud & Data Analytics

Berlin, Germany • (+49) 176 6723 9250 • pagadalaabhishek60@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Versatile Full-Stack DevOps Engineer with 5+ years of experience spanning cloud infrastructure (Azure), CI/CD automation, data analytics, and AI-driven development. Currently building and scaling a production on-demand services platform (Ayonic) end-to-end — from Flutter mobile apps and server infrastructure to Stripe payments and Cloudflare security. Pioneering AI-augmented development using agentic AI (Google DeepMind Antigravity), RAG pipelines, LLMs, and custom AI workflow orchestration to accelerate delivery velocity. Pursuing MSc in Data Analytics at Berlin School of Business and Innovation (BSBI), combining hands-on engineering with advanced data science and machine learning expertise.

KEY HIGHLIGHTS

- Built end-to-end CI/CD pipelines deploying Flutter apps to App Store & Google Play via GitHub Actions
- Designed 7 reusable AI agent workflows reducing repeat task resolution time by 80%
- Reduced Azure cloud costs by 30% through resource optimization & auto-scaling
- Implemented Cloudflare DDoS protection & CDN with zero-downtime production cutover
- Azure Certified: AZ-900 (Fundamentals) & AZ-104 (Administrator)
- Managed infrastructure serving multi-environment deployments with 99.9% uptime

TECHNICAL SKILLS

Cloud & Infra	Azure (VMs, AKS, App Gateway, Monitor, Cost Mgmt), Terraform, Docker, Kubernetes, Cloudflare (CDN, WAF, DNS), Nginx, Ansible, Helm
CI/CD & DevOps	GitHub Actions, Azure DevOps, Jenkins, ArgoCD, Git, Automated Deployments, Secrets Management, Concurrency Control
AI & Automation	Agentic AI (Antigravity / DeepMind), LLMs, RAG, MCP Servers, Prompt Engineering, AI Agent Orchestration, AI Workflow Design, Hugging Face, Transformers
Backend	PHP (CodeIgniter 4 / Laravel), Python, Django, Node.js, REST APIs, ARM Templates, PowerShell, Bash
Frontend & Mobile	Flutter / Dart, React, Angular, TypeScript, HTML, CSS, JavaScript, Bootstrap, Responsive Design
Databases	PostgreSQL, MySQL, MongoDB, CosmosDB, Neo4j, SQL Server
Payments & APIs	Stripe (Payments, Refunds, Webhooks), PayPal, RESTful API Integration
Security	Cloudflare DDoS Protection, SSL/TLS, RBAC, Azure Policies, Fail2ban, UFW Firewall, Prometheus, Grafana
Data & Analytics	Python, Pandas, NumPy, R, TensorFlow, PyTorch, Jupyter, PowerBI, Tableau, Power Apps, Power Automate, Spark, Hadoop, Google Colab, Machine Learning, ETL Pipelines, Statistical Modeling

PROFESSIONAL EXPERIENCE

Full-Stack DevOps Engineer
Jan 2026 – Present

Ayonic — On-Demand Services Platform · Berlin, Germany

- Architected and maintained 7+ GitHub Actions CI/CD pipelines for automated Flutter iOS/Android builds, staging deployments, and production releases with rollback capability
- Built and deployed cross-platform Flutter mobile applications (Customer & Provider) to App Store via TestFlight and Google Play, resolving complex dependency conflicts and iOS signing challenges
- Implemented Cloudflare CDN and security layer across staging and production environments, including DDoS protection, WAF rules, SSL management, and webhook security — achieving zero-downtime migration
- Designed and integrated Stripe payment flows end-to-end (mobile → API → Stripe), debugging critical payment amount conversion issues and implementing refund logic
- Managed Linux servers for staging and production: Nginx configuration, file permissions, automated daily MySQL backups, SSH hardening (Fail2ban, UFW), and real-IP restoration
- Pioneered AI-augmented development using Google DeepMind's Antigravity (agentic AI), RAG pipelines, and MCP servers — accelerating development velocity by 3x
- Created 7 custom AI agent workflows and knowledge bases for CI/CD, deployment, database operations, and troubleshooting — reducing recurring task resolution time by 80%
- Implemented multi-language support (German/English) with automated translation pipelines using Google Translate API integration
- Administered PHP (CodeIgniter 4) backend API, MySQL database operations, admin panel, and user management across multiple environments

Senior Analyst — Cloud Operations Engineer
Oct 2024 – Feb 2025

Enstoa · Hyderabad, India

- Managed daily operations of Enstoa Cloud platform, supporting systems, networking, security, and storage for enterprise clients
- Automated provisioning of Azure VMs and cloud services using Terraform (IaC), reducing deployment time from hours to minutes
- Administered and optimized databases as DBA, ensuring high availability and performance
- Enhanced cost efficiency by 25%+ using Azure Monitor, Cost Management tools, and resource right-sizing strategies
- Implemented CI/CD pipelines for infrastructure provisioning and application deployment automation

Azure DevOps Engineer
Oct 2023 – Nov 2024

Tata Consultancy Services — Novartis · Hyderabad, India

- Designed and managed Azure DevOps CI/CD pipelines for enterprise pharmaceutical workloads, automating build, test, and release cycles
- Built custom Power Apps solutions for internal workflow automation, streamlining operational processes across teams
- Implemented infrastructure automation using Terraform and ARM templates across multi-subscription Azure environments
- Provided Level 2/3 infrastructure support for Azure cloud services, resolving incidents related to VMs, networking, and storage
- Automated repetitive operational tasks using Power Automate and PowerShell scripts, reducing manual effort by 40%
- Managed Azure resource governance, implementing policies and RBAC across multiple subscriptions for compliance
- Collaborated with cross-functional teams including QA, security, and development to streamline release management

Cloud Support Engineer
Apr 2021 – Oct 2023

Tata Consultancy Services — Stellantis · Hyderabad, India

- Provisioned and managed cloud infrastructure using Terraform (IaC) for automotive industry workloads
- Maintained AKS (Azure Kubernetes Service) clusters, optimizing costs through resource scheduling and right-sizing
- Configured Azure Application Gateway and enforced IAM policies with RBAC across 50+ Azure resources
- Deployed Azure Policies through DevOps pipelines to enforce organizational governance and compliance
- Resolved critical P1/P2 incidents and automated security remediation workflows using Azure Logic Apps

Web Developer
Nov 2020 – Feb 2021

Genex Pvt Ltd · Hyderabad, India

- Developed responsive web applications using Python, Django, React, and front-end technologies (HTML, CSS, JS, Bootstrap), translating Figma wireframes into production-ready interfaces

CERTIFICATIONS

- **AZ-104** — Microsoft Azure Administrator
- **Terraform Associate** — HashiCorp
- **CI/CD Pipelines** — GitHub / Udemy
- **Full-Stack Web Dev** — Udemy
- **AZ-900** — Microsoft Azure Fundamentals
- **DevOps Engineering** — Microsoft / Udemy
- **AI Agents** — Hugging Face

EDUCATION

MSc in Data Analytics
Oct 2024 – Present

Berlin School of Business and Innovation (BSBI) · Berlin, Germany

B.Tech in Computer Science & Technology
Jul 2016 – Aug 2020

Jawaharlal Nehru Technological University (JNTU) · Hyderabad, India

ACADEMIC PROJECTS

Credit Card Fraud Detection System
2019 – 2020 · Major Project

Java, Ada Boost, Machine Learning, Scikit-learn

- Developed an ML-based fraud detection system using Ada Boost ensemble algorithm to identify fraudulent credit card transactions in real-time, achieving high precision and recall on imbalanced datasets

Market Basket Analysis (MBA)
2018 · Minor Project

Python, Apriori Algorithm, Association Rule Mining, Data Analytics

- Built a market basket analysis system using association rule mining to discover product purchase patterns, achieving 97.79% accuracy in predicting customer buying behavior for retail optimization
